Nahyaan Naveed

Associate Software Engineer

Work Experience

ServiceNow Developer – Zones IT Solutions (2025 – 2025)
- Worked on 50 real client scenarios and developed innovative solutions using server side and client side scripting.
- Performed tasks using the ServiceNow Platform, writing code and working in ITSM and service portal management.

Projects

Safar Transit Application in Flutter
- Developed and implemented innovative features using Flutter framework and packages for a final year project.
- Collaborated with cross-functional teams to implement UI changes based on user feedback.
- Integrated multiple APIs including Firebase, Google Maps API, HuggingFace to create a seamless project.

Delivery Tracking Application in Flutter
- Utilized Google Maps API to track driver locations in real-time, reducing delivery times and increasing efficiency.
- Developed and implemented a user-friendly interface for the food delivery app, increasing customer satisfaction.

Chat-Now in Flutter
- Designed a seamless chat application complete with push notifications sent to all users upon receiving a message.
- Integrated a customizable profile with native device feature usage ex. Camera

E-Commerce Application in MEAN Stack
- Developed a comprehensive online shopping application using HTML, CSS and JS.
- Customized and trained an AI chat-bot using TensorFlow to better accomodate users inside the application.

Technical Skills

Microsoft Office, Documentation, Game Development, Backend Integration, Cypress, JUnit, API Integration

Education

Bachelor of Science in Software Engineering – COMSATS University Islamabad
A-Levels Majoring in Information Technology – PISES - English Section
